MAGIC

KUTHUMI & SARAH

© LAUREN HUTTON, MARCH 2022

Hello friends! It is Sarah, joined with Kuthumi. We are not confined to the limits of time and space. We cannot be confined by the limits of time and space and technology and whatever else to get this information out to you.

So, this will be going into the cloud. This will be going to our highest-level patrons of the page—you guys keep everything running, thank you so much. And this goes to the people who signed up to do the event, all eight of you to do the small group event, and without you guys adding your energy and consciousness to it there would be no presentation.

So, the magi and the magic. We could also call this being the Undefined YOU in an Undefined Reality. Now this is a lot of science, there's a lot of science in here. I never thought of myself as a science person, however, as my human personality has flaked off and away to reveal the radiance, the eminence of my divine personality, I have found that I'm very, very good at science.

And I asked Kuthumi, could we do this without science? And he said, that's not really (the question)— so we realized that's not really the question. No, we cannot do this without science because we can't do this without our biology.

What we're describing here is the embodied magi experience. The Merlin Experience. The embodied consciousness experience. And that includes the biology. Now some of you have this Atlantean design mind category thought that you're ditching your biology to stay on planet Earth— you are NOT.

The biology integrates into the Free Energy Vessel creating the New Human Species. If you haven't taken the Light Body Sessions ([Vol. One](#) & [Vol. Two](#)), it's basically a six month program. It's a lot of content, it's hours and hours of content that we suggest you take over a six-month period.

So, this is kind of an extension of that, however, the Light Body is not required for this course.

What is required? A deep sensual inner life, right? A deep sensual inner life. A basic understanding of the Atlantean design mind and how it creates an external reality and an internal reality.

So we're really going beyond anything I've experienced and we're going— I mean, I've experienced all this so I could bring it to you. But we're going beyond... we're really going beyond Crimson Circle. Most of you have come from that type of teaching, and we're really going beyond the limits of where it has dropped us off, though I'm sure they'll catch up with us, wink.

Yeah, a lot of this Adamus or Saint Germain has peppered throughout various Keahaks, various shouds, various events (of the Crimson Circle organization). So, he has given us bits and pieces and so, I want to honor that— a lot of the talk about neurons and things like that.

So, wow! Here we go! Okay.

ART MEETS CREATION
THE SCIENCE OF
THE SOVEREIGN MIND

So, what we're really talking about today is about art meeting creation. Art is a way to express ourselves in a way that we're not being met in the world. It fills a gap, in some ways for some people. It's a bridge, for some people. But art can imitate life and life can imitate art.

However, what is it when art meets our creation? When the painting comes alive? When the creator is in his or her creation?

We're also going to talk deeply today about the science of the sovereign mind. Maybe we didn't screw it up so bad in Atlantis with the headband.

Maybe we created potentials, possibilities, probabilities, and passageways— what Kuthumi and I call *the 4 P's*— for the mind to become a sovereign experience.

KNOWINGNESS & THE SOVEREIGN MIND:

SENSUALITY MEETS EXPERIENCE

"WHAT IF THE SENSUALITY OF YOUR INNER WORLD APPEARED IN YOUR DAY TO DAY LIFE?"

WOULD MORE SRB'S CHOOSE TO STAY ON EARTH IF THIS WAS THEIR EXPERIENCE?"

MORE SO THAN REALIZATION OR JUST ABOUT ANYTHING ELSE,

WHEN KUTHUMI AND I FEEL INTO WHAT CONSCIOUSNESS BEINGS ON EARTH TRULY
DESIRE....

MANY ANSWER: TO HAVE THE DIVIDE LIFTED BETWEEN INNER SENSUALITY AND THEIR
DAY TO DAY EXPERIENCE ON EARTH.

B-O-N-S-C-R-E-E-N

CURRENTLY, PHYSICAL REALITY IS PERCEIVED MAINLY THROUGH THE REFRACTORY LIGHT
OF THE MINDS' NARROW PERCEPTIONS AND/ OR CLOSED-LOOP SYSTEMS.

THUS, WE HAVE TO GO BEYOND IT TO TAP INTO OUR INNATE SENSUALITY.

Alright, so the name of this course, as we designed it, and it has taken... This was the seed, and it has branched out into a beautiful tree with infinite branches and infinite leaves and infinite space between the leaves. We'll show you more.

We called this, *Knowingness & the Sovereign Mind: Sensuality Meets Experience*.

So, the question – the self-inquiry question – that Kuthumi asked of me, and I asked of you is:

“What if the sensuality of your inner world appeared in your day-to-day life?”

Would more SRB's— Self Realized Beings— choose to stay on Earth if this was their experience?

More so than realization or just about anything else, when Kuthumi and I feel into what conscious beings on Earth truly desire...

Many (beings) answer:

To have the divide lifted between inner (world) sensuality and their day-to-day (external) experience on Earth.

I went to... when I was an eager, eager beaver Shaumbra, I went to an event called BON, B-O-

N. And Adamus talked about the BON screen. So (in that concept) consciousness is the blank canvas in which reality is projected.

The human prior to realization, prior to having the awakening that it's so much more, it just focuses on the image projected onto the screen.

And that deep inner dive that takes you into the self-realization experience, (which) is focusing on that black blank canvas called consciousness.

So, prior to the awakening experience you're focused only on the projected screen.

In self-realization, in some ways, you're focused only on... not on the light projections (on the screen), but on the black blank canvas of consciousness.

(In order to answer) the question, "Who am I?"

Currently, physical reality is perceived mainly through the refractory light of the mind's narrow perceptions and/ or closed-loop systems.

So, we're going to talk about the eyes, but it applies to sound, touch, taste, and the other human senses.

We see an image; it meets our retinas. The light meets our retinas, it flows through the biological brain mechanism to the back of the brain, and it's filtered.

And then, how we think about the image we're seeing, the perception we have of it, the information travels back up (to the front of the brain).

It's kind of an antiquated system.

There's an external reality that is projected through shadows and light. It meets the retinas, it goes through this experience (through the brain), and (it) comes back out (after being filtered by perceptions).

So that's the way the majority of the world views externality.

Science is catching up to what we already know: It takes the human being, it takes the observer, it takes the perceptions of the observer for this external physical reality to exist.

The physical external reality, including time and space, would not exist without the observer or the perceiver (experiencing both time and space).

So, what we've had to do is go beyond the mind to tap into our innate sensuality.

If you look at anything... I went to the Rude Awakening documentary page today just to check in on it with Kuthumi, he wanted to look at it. It says, "Going beyond the mind."

When I went to the Threshold event with Crimson Circle, Adamus told me I was *going beyond the mind*. Right?

So, we have to go beyond the mind to tap into our innate sensuality, but if you're going to *Nam-a-stay* (said as Namaste)— *I'm gonna stay on Earth*.

If you're gonna *Na-ma-STAY* on Earth, as Kuthumi and I call it, eventually the mind needs to come along for you to have the full magi sovereign mind, sovereign biology experience.

KNOWINGNESS & THE SOVEREIGN MIND:

SENSUALITY MEETS EXPERIENCE

WHAT THAT CREATES IS A DIVIDE BETWEEN OUR RICH INNER WORLD
AND THE PRESCRIBED EXTERNALITY CALLED EARTH.

BOTH ARE AN ILLUSION!

YET, AS THE ATLANTEAN-DESIGNED MIND INTEGRATES INTO
ITS NATURAL STATE OF OMNI-AWARENESS

- THE LIGHT REFRACTIONS PRODUCE MULTIPLE, MALLEABLE, FLUID - AND DOWNRIGHT TRIPPY AT TIMES -
REALITIES, IN WHICH WE ARE THE STAR OF OUR OWN SHOW.

THE DIVIDE BETWEEN INTERNAL AND EXTERNAL IS LIFTED TO ALLOW LIFE TO FLOW UNFILTERED.

THE MAGIC OF THE MAGI.
A CREATION OF A ENTIRELY NEW RELATIVITY.
A NEW EARTH CALLED THEOS.

BEYOND THE ATLANTEAN DREAM

So, (you) having to go beyond (the mind) creates a divide between our rich inner world and the prescribed externality called Earth, or mass consciousness, or collective Shaumbra consciousness, or collective spiritual consciousness, or collective teacher consciousness, whatever you're involved in.

And what Kuthumi and I are saying— they're both an illusion.

The inner world is an illusion, and the external world is an illusion because *all duality* is an illusion.

There's actually no divide between internal and external.

As the Atlantean-designed mind... which was created to *neutrally* have an experience where you have a real full experience in a physical reality, in a standardized form, in your human avatar form— to interact with other humans in the same standardized form – to level the playing field, to have the experience. Right? It was not a bad thing.

Neutrality.

The Atlantean-designed mind— eventually if you stay here long enough. For me, I'm almost at

five years; it's taken that long. The Atlantean-designed mind integrates into its natural state of omni-awareness.

That severed part— we talked about this in other courses so I'm not going to do it here. The part that severed us from gnost – or knowingness – the intelligence that exists without the constructs of time and space and physicality, unlike the Atlantean-designed mind.

As the Atlantean-designed mind integrates into its natural state of omni-awareness, what happens is these light refractions which create our external reality produce multiple, malleable, fluid - and downright trippy at times - realities in which we are the star of our own show.

The caveat here is you cannot be the star of your own show until you've gone beyond identity. (The) human choosing self-realization would be an identity.

“This is my last lifetime.”

Identity. Right?

Until the ego becomes the wego, until you find your YOU in an Undefined State of Being without losing the knowingness of who you really are— I Exist, I Am that I Am, I Am that I Am on Earth AND beyond it, simultaneously.

So that's the caveat. If you still have an identity that you're hanging on to, that you're trying to feed, this is not going to happen. We'll get into the why and the how in this presentation.

So as the Atlantean-designed mind integrates into its natural state of omni-awareness, the light refractions produce multiple, malleable, fluid - and downright trippy at times - realities in which we are the star of our own show.

The “my” being the God, also, rather than a me-pattern self.

The divide between internal and external is lifted to allow life to flow unfiltered.

The magic of the magi.

A creation of an entirely new relativity, an entirely new real-illusion, relative reality.

A New Earth called Theos.

Now, Theos is not necessarily my thing, but Kuthumi— because, you know, I'm embodied *here* on Earth. And everything's about really being here on Earth. If I'm going to be here, I might as well do it up, right? If I'm just going to sit around and not interact with Earth, there's really no point in *Namastaying* on it.

I mean, I guess you could say you're, 'helping the planet'. But if you don't have any passion for 'helping the planet', and you're just here out of obligation, then there's no point.

So, Kuthumi talks about Theos as an overlay. We're on the same rock. But our image projections on the rock begin to differ and co-mingle.

They don't come together. New Earth and Old Earth don't come together, but they begin to co-mingle. One impacting the other and vice versa. Creating a very malleable reality in which a magi can interact.

So, we're really going beyond the Atlantean dream. Way far beyond it.

Alright, so we're going to dive in. But before we do that actually, we're going to go back here.

ART MEETS CREATION

THE SCIENCE OF THE SOVEREIGN MIND

I'm going to read you something Yogananda wrote and we're going to cross that little bridge right there.

“Just imagine! If you were living in this one room all of your life, having no contact with or knowledge of what is beyond these walls, you would say that this is the whole of your world. But if someone were to take you into the world outside, you would realize how infinitesimal your ‘world’ was.”

Infinitesimal means how small and minute and miniscule the world you thought you lived in actually was.

“So, it is with the perception of Christ Consciousness.”

Energy and consciousness combined. New Energy.

“So, it is with the perception of Christ Consciousness. The scope of mortal consciousness by comparison is like observing only the area of a tiny mustard seed to the exclusion of the rest of the cosmos. Christ Consciousness is Omnipresence, the Lord spread over every pore of infinite space and permeating every atom.”

And subatomic particles as well, I will add (laughing).

Yeah, so science is starting to catch up. Yogananda has a list of science that was catching up

when he wrote this book called, *The Yoga of Jesus*, which is very, very good.

In the last six months, so much science has come out telling us what we, as realized beings, already know.

I will say that self-realization is still like being in the closet.

You have to open the door of the realization closet to really, truly experience the Universe of YOU. The infinite-ness of Self.

And what happens while you're in the closet, is that dragon clarity comes in and burns up all the belief boulders.

Sensuality, going beyond the mind, allows you to experience something *without* the need to perceive it.

So, going beyond the mind allows you to tap into the sensuality of your I Am that I Am, your I AM Presence, right?

That allows you to begin to truly understand how to experience something, comprehend something, without chopping it up through perceptions.

No, we're not getting rid of all our perceptions, but we're going to bring them back in to meet with sensuality. You don't *need* to perceive something in a certain way. You have the kaleidoscopic experience.

Alright, let's get into the science stuff.

THE FATHER OF NEUROSCIENCE:
SANTIAGO RAMÓN Y CAJAL

CAJAL PRODUCED THE FIRST CLEAR EVIDENCE THAT THE BRAIN IS COMPOSED OF INDIVIDUAL CELLS, LATER TERMED NEURONS, THAT ARE FUNDAMENTALLY THE SAME AS THOSE THAT MAKE UP THE REST OF THE LIVING WORLD.

HE BELIEVED THAT NEURONS SERVED AS STORAGE UNITS FOR MENTAL IMPRESSIONS SUCH AS THOUGHTS AND SENSATIONS, WHICH COMBINED TO FORM OUR EXPERIENCE OF BEING ALIVE: "TO KNOW THE BRAIN IS EQUIVALENT TO ASCERTAINING THE MATERIAL COURSE OF THOUGHT AND WILL," HE WROTE.

E N E R G E T I C I M P R I N T S

THE HIGHEST IDEAL FOR A BIOLOGIST, HE DECLARED, IS TO CLARIFY THE ENIGMA OF THE SELF. IN THE STRUCTURE OF NEURONS, CAJAL THOUGHT HE HAD FOUND THE HOME OF CONSCIOUSNESS ITSELF.

*The Brain in Search of Itself.
Santiago Ramón y Cajal and the Story of the
Neuron, by Benjamin Ehrlich. 2022.*

We really can't talk about being an embodied magus or magi, magi being plural, without talking about the biology.

So, I want to talk about the Father of Neuroscience. He was not just a scientist; he was also a very well-known artist. His work is still being displayed in museums all across the world. Exhibitions are everywhere. He's a headliner in the New York Times style section. He died in 1906.

NOTE: He actually won the Nobel Peace Prize for his discoveries in 1906. This was a misspeak. He was born in 1852 and died in 1936, which means he was alive at the same time as Kuthumi and my previous lifetime, Enola (1898-1936).

So, the Father of Neuroscience – his name is Santiago Ramón y Cajal – and he produced the first clear evidence that the brain is composed of individual cells. These are called neurons. He discovered the neuron.

He also discovered that these individual cells are fundamentally the same as those that make up the rest of the living world. No divide between internal and external.

He believed that neurons served as storage units for mental impressions such as thoughts and sensations, which combined to form our experience of being alive. He said and he wrote in his journal, "To know the brain is equivalent to ascertaining the material course of thought and will."

Will is that which turns thought into energy. That's Yogananda's definition of will. Will is that which turns thought into energy.

We use the term— instead of memories, we talk about things as energetic imprints. Instead of *lifetimes* they're an *energetic imprint*.

So, if you're new to the term I just want to introduce it right here because we're going to use it.

Energetic imprints.

The Wall of Fire is made up of energetic imprints, paths you did take and didn't take. Lifetimes and un-lifetimes.

Every potential, possibility, probability, and passageway. ALL your energy. The Wall of Fire is all your energy. It is made up of energetic imprints.

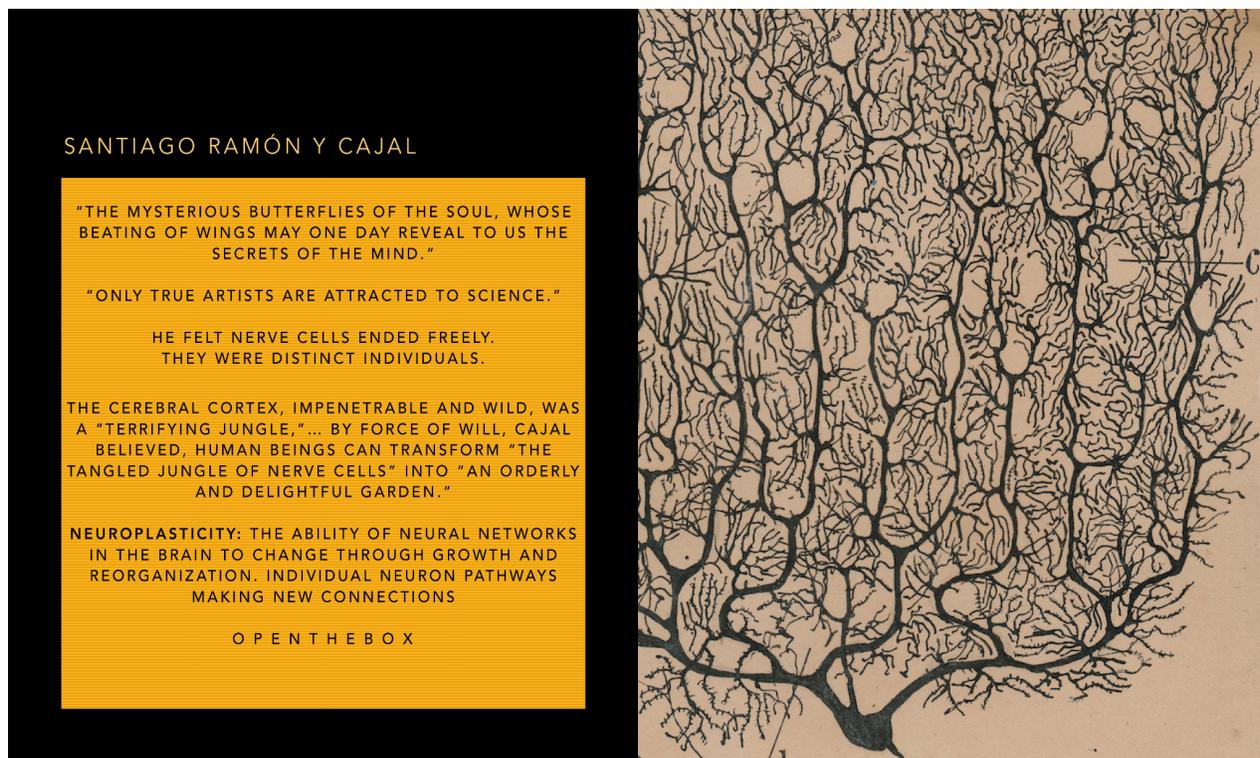

Mister Señor Ramón y Cajal said, "The highest ideal for a biologist is to clarify the enigma of the self."

I read this after I recorded our fifth Light Body Session video called, *Living the Enigma*. So, I really love to read this. I love when the synapses go - (popping sound effect). It's like little bubbles flying up in the air.

He said, "The highest ideal for a biologist is to clarify the enigma of the self."

In the structure of neurons— these individual cells in the biological brain. In the structure of neurons, he thought had found the home of consciousness itself.

The credit here is: this is from a book that was just published. It's called, *The Brain in Search of Itself*. And it's written by Benjamin Ehrlich. German guy. And it is available on [Amazon](#) and other places.

So, this is one of Mister...of Señor Ramón y Cajal's drawings that are on display. I got this from the University of Cornell website. These are traveling. His artwork is traveling. So, he was a scientist and an artist.

This is a drawing of neural networks in the brain that he observed under a microscope. It looks an awful lot like the Banyan Tree (laughing).

So, this lovely Father of Neuroscience, he said that neurons— these individual cells, we could almost think of them as sovereign cells. These individual neurons, or these energetic imprints, these individual cells, to me, they each contain an energetic imprint.

That's how I can access all my lifetimes. That's how I can access all potentials, possibilities, probabilities, and passageways while being in physical form.

He said neurons were, "mysterious butterflies of the soul, whose beating of wings may one day reveal to us the secrets of the mind."

And he also wrote, which I thought was interesting because I know a lot of artists, a lot of people here are painters, "Only true artists are attracted to science." I just loved that.

So, this is where he was really revolutionary. He felt, the Father of Neuroscience here, our buddy Santiago felt nerve cells ended freely. And that they were distinct individuals. Each nerve cell, neuron, was a distinct individual.

He said the cerebral cortex, which is the make-up of this whole thing, was impenetrable and wild. He called it a “terrifying jungle,” ...but he said, by force of will, which we’ll just say it’s consciousness. By becoming aware, right?

‘Will’ is something... and ‘force’ have become like bad words, but we use them all the time in the back-end. (Master EI) Morya used them a lot.

Through will, and I want to say through divine will, because if you’re doing this through human will, you’re just trying to get all your neurons to reinforce an identity.

So, we have to go beyond identity, that’s the caveat.

None of this will work or make sense if you’re still clinging onto an identity.

Alright, so by force of will— will, that which turns thought into energy – Cajal believed that human beings can transform “the tangled jungle of nerve cells” into “an orderly and delightful garden.”

Yogananda would say that this is the science of GodSelf Realization. This is the purpose of meditation.

This is the purpose of Kriya yoga... is to take this terrifying jungle, absolute chaos, mind closed-loop system, mind repeating thoughts, grabbing onto (and) creating emotions that keep you stuck in the muck, you know all that stuff. The suffering of being human, the crystal prison of the mind.

NOTE: True yoga and meditation are both really about simply backing away from the need to perceive.

He thought, in the late 1800’s, he thought that this terrifying jungle... and this is through his studies and through his art.

“The tangled jungle of nerve cells” can turn into “an orderly and delightful garden,”— actually compared and based on the Saint Germain gardens in, I think, Paris, where it’s so organized and beautiful.

He also at the end introduces the idea of neuroplasticity. It’s starting to reach, almost reaching, full acceptance in a scientific community that new neurons can be produced. That neural pathways can change.

This is like the open the box video that we did in the [January Satsang](#) (2022).

So, we're going from a closed-loop system where things are just repeating themselves— the balls are stuck in the box, to opening the box— the ball pops out.

This is neuroplasticity. The ability of neural networks in the brain to change through growth and reorganization. From closed loop to open loop system. Development of new neural networks that aren't in either/or dynamics, but are in the AND.

Individual neuron pathways making new connections.

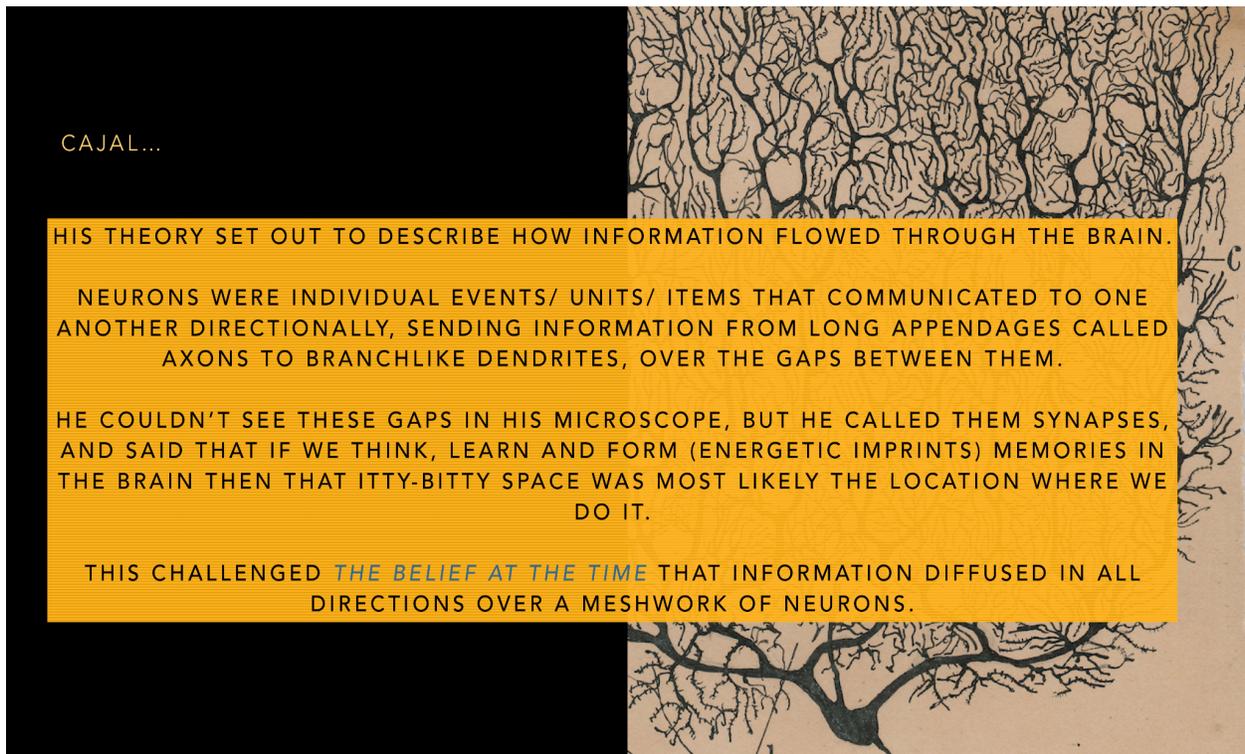

So, one energetic imprint *here*, in its individualized cell, making a connection and communion with another energetic imprint *here*, which creates a whole new reality for you to experience, for example.

Kuthumi's saying, "O P E N T H E B O X."

Anytime you see a word that's written with the spaces in-between it's Kuthumi.

BEYOND THE ATLANTIAN DREAM

OOOOOOPEN THE BOX

Alright, so continuing with the Father of Neuroscience and his beautiful artwork. His theory set out to describe how information flowed through the brain.

Neurons were individual events/units/items that communicated to one another directionally, sending information from long appendages called axons— these are like the tree, to the branchlike dendrites, over the gaps between them.

Because of technological limitations he couldn't see the gaps in his microscope, but he called them synapses. Synapses would be this beige area between all the tree branches and the leaves.

So, he called them synapses. And he said that if we think, learn, and form memories— we call them energetic imprints. If we form energetic imprints in the brain then that itty-bitty space between all this, the beige part, was most likely the location where we do it.

This challenged the belief at the time that information diffused in all directions over a meshwork of neurons.

So, everything's moving through this mesh instead of an individual cell lights up. You've all had that aha moment. That's a neuron in your mind lighting up saying, "Oh! I know this. I know that I know."

When you say, "I Am that I Am," this whole back cerebral cortex is going... "Okay. I Am that I Am. I know that I know." It sends signals out to the entire body.

Thank you, neurons. Individualized cells. Each one sovereign. Individualized sovereign cells.

—

(Extra slides with additional information, not shown in presentation)

SYNAPSES

SYNAPSES CONNECT NEURONS IN THE BRAIN TO NEURONS IN THE REST OF THE BODY AND FROM THOSE NEURONS TO THE MUSCLES...

A SYNAPSE IS THE SMALL GAP BETWEEN TWO NEURONS, WHERE NERVE IMPULSES ARE RELAYED BY A NEUROTRANSMITTER FROM THE AXON OF A PRESYNAPTIC (SENDING) NEURON TO THE DENDRITE OF A POSTSYNAPTIC (RECEIVING) NEURON.

IF WE CAN VIEW INDIVIDUALIZED NEURONS AS ENERGETIC IMPRINTS, THEY CAN COMMUNICATE TO THE INTEGRATED BIO BODY - WITHOUT THE BODY USING COMPLEX, ANTIQUATED SYSTEMS

OR EVEN MORE SO RELYING ON PAST EXPERIENCES EVEN IF THEY HAVE COME TO WISDOM. NOW WE ARE IN THE DEVIR/ GHOST/ KNOWINGNESS EXPERIENCE WHICH IS FREE FROM TIME AND SPACE BUT CAN SIMULTANEOUSLY EXIST WITHIN IT.

BRAIN MALLEABILITY

NEUROPLASTICITY:

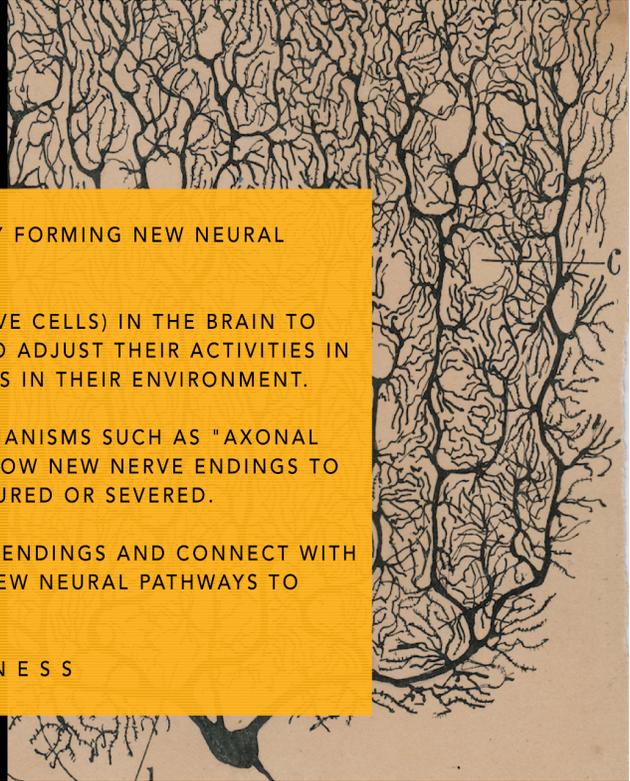

THE BRAIN'S ABILITY TO REORGANIZE ITSELF BY FORMING NEW NEURAL CONNECTIONS THROUGHOUT LIFE.

NEUROPLASTICITY ALLOWS THE NEURONS (NERVE CELLS) IN THE BRAIN TO COMPENSATE FOR INJURY AND DISEASE AND TO ADJUST THEIR ACTIVITIES IN RESPONSE TO NEW SITUATIONS OR TO CHANGES IN THEIR ENVIRONMENT.

BRAIN REORGANIZATION TAKES PLACE BY MECHANISMS SUCH AS "AXONAL SPROUTING" IN WHICH UNDAMAGED AXONS GROW NEW NERVE ENDINGS TO RECONNECT NEURONS WHOSE LINKS WERE INJURED OR SEVERED.

UNDAMAGED AXONS CAN ALSO SPROUT NERVE ENDINGS AND CONNECT WITH OTHER UNDAMAGED NERVE CELLS, FORMING NEW NEURAL PATHWAYS TO ACCOMPLISH A NEEDED FUNCTION. ~ WEB MD

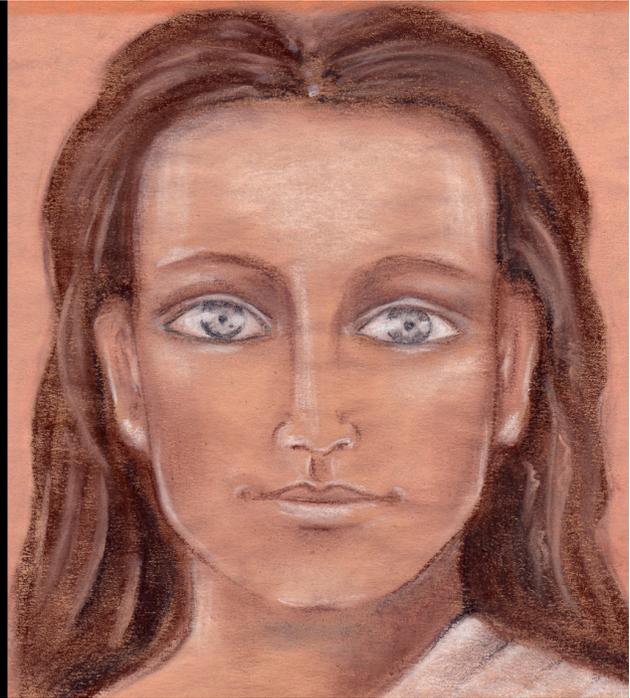

A N D I N R E S P O N S E T O C O N S C I O U S N E S S

A PERSONAL ANECDOTES

BABAJI &
THE SEMI-TRUCK

OLLIE &
THE HOT PAN

Alright, I'm going to give you some personal anecdotes. I'm going to start with Babaji and the semi-truck, go through the examples, and then I'll come back and do Ollie and the hot pan.

This is the closest — copyright that I own — image of Babaji that I can find. It's not exact but I don't see him as old or wise even; he's just young and vibrant.

I was driving back from Mexico, right? Things had been happening leading up to this. I just kept seeing more and more cracks in the time space continuum. I see them as little sparks.

They're like little stars. It's like seeing a falling star, you catch it out of the corner of your eye, and you go, "Oh, another falling star." Little cracks in the time space continuum.

So, in Mexico I was on a two-lane road. One lane of traffic going north. One lane of traffic coming towards me going south. The way Mexicans drive is, that turns into a four-lane highway, even though there's only two lanes.

If there's a car going here (in one lane), and it's going really slow, I'm going to pass it. I put my blinker on, I veer into the oncoming traffic and go around it. Normal for Mexican driving.

Sometimes what happens is: I'm driving *this way* (on the left), and this person is going *this way* (on the right, other direction). And someone else tries to pass *here* (in the middle), and I try to pass *here* (in the middle). So, we are using the same space to pass.

I'm normally really, really good at it (laughing). But on this particular day, I'm going around a truck and a huge semi-truck, carrying barnyard animals and vegetables and everything else.

I'm on farm roads. I go the back way. I like to go 'back in time' and look at all of the farmland. And I see this truck is going around another car, and I'm going here (in the middle of the road). So, we're going to collide.

And then I see the *lovely* Mahavatar Babaji, who I talk to a lot. I don't talk a lot about him here, but it's part of where my experience comes from. He shows up. His face is there, just like you see here... not *just* but similar to what you see here.

His face is there and it's like... I'm in the hovering mode of the 4 P's: potentials, possibilities, probabilities, and passageways— but I don't make a decision.

I'm going to tell you how, why, and the science behind it.

WAVE FUNCTION COLLAPSE

- Multiple outcomes (Ps) hang in the air until a wave function collapse makes the entire ensemble work together to produce a single perceived outcome.
- What exactly pulls the trigger in a wave function collapse?
- The common idea that the collapse is triggered by 'my' perception of one thing or another.
- The Ps hang in the air until perceptions from a 'me' consciousness produce a single outcome.
- The collapse into a single experience depends on how the brain processes information...

-THE GRAND BIOCENTRIC DESIGN: HOW LIFE CREATES REALITY
ROBERT LANZA, MD & MATEU PAVSIC WITH BOB BERMAN, 2020

Just so I'm going over everything I can possibly go over, to tell you where it all comes from, this is a compilation. This is many months of doing. I'm a mad scientist, I have notes and papers everywhere (laughing).

This comes from one of my favorite books, *The Grand Biocentric Design: How Life Creates Reality*. This guy, Robert Lanza, MD; he was one of the most influential people in Time Magazine in the year 2014. He is a leading researcher on stem cell research.

Like instead of getting a knee replacement, you would get stem cells inserted into your kneecap and it would regrow itself. So, you wouldn't have to have a major surgery. Sounds good to me, should I ever need a knee replacement.

Alright, so wave function collapse.

Adamus talks about particles and waves, right? He's talked about it a lot. For those of you who come from Crimson Circle, we're really trying to move beyond our Crimson Circle background.

It's always going to be there. We're always going to honor it; we're always going to appreciate it. But it's really finding my *own* space and sharing with you that way.

For now, I'm just going to keep pulling that back in. That's why I do that— so there's a qualia reference point. There's a neural network that goes, "Oh, yeah! Okay." Wave and the particle. Wave and the particle. Got it.

So, wave function collapse. I'm going to explain this to you in (my own) terms. I gave you a physical example, Babaji and the semi-truck. The wave function is like... so imagine all the multiple outcomes of this experience. There (are) so many possibilities:

I get hit; I'm uninjured but my car is totaled.

I get hit; but I'm super injured and I have to go to the hospital.

My car is totaled, and the other car is in varying degrees of whatever. The animals in the truck, you know, all of these different possibilities, probabilities, potentials, passageways, ALL of it.

So, the multiple outcomes hang in the air until a wave function collapse— this is literally a mathematical equation of all the different possibilities.

Like if you were playing poker, how many different card options are there?

So, it's literally a mathematical equation, but eventually the wave function, which is all the P's hanging in the air, will collapse to produce a single perceived outcome. The end result. That's when the wave function collapses.

Scientists have been trying to figure out why the wave function collapses— why do things happen?

What exactly pulls the trigger in a wave function collapse?

The common idea, right now, is that the collapse is triggered by 'my', not me personally, but by the perception of the observer of one thing or another.

I mean, if you're going to go into like *manifestation world*, the law of attraction, the secret, you manifest your reality... Someone who's like, "Everything in my life always sucks, and blah blah blah." They're going to get into the wreck so they can continue to complain about it because they actually really enjoy it.

This is law of attraction stuff. If they're a *super positive* person and they're just really, really lucky all the time, they'll make it out okay and they'll call their friend and say, "Yeah! I used the law of attraction and I made it out!"

Alright, so here I am in this space. I'm watching this all unfold. It's going quantum but everything slows down. Babaji's just there smiling and I'm smiling back at Babaji going, "*What?!?*"

But I don't have a desired outcome. I don't have an agenda and I know some of you are going, "Yeah, right."

No, because it's just not possible because I don't have an identity to reinforce. It's very hard to explain until it happens to you. But I'm asking you to just take my word for it, please. I can't go in there to go, "Oh, I want to do this and then..."

Everything just hangs in the air. I literally see, *literally*, not in my mind's eye. I literally see a crack in the time space continuum, and I shoot out the other side. And it's like... Okay, that was interesting.

But I was just looking at Babaji, I wasn't readjusting the steering wheel. I think, maybe I did slow down. But the wave function did not collapse is what I'm telling you.

Right, for anybody else it's like: If you're in a relationship— does it work? Does it not work out? You're just stressed over all the potentials of everything. Eventually, the wave function collapses and produces a single perceived outcome like: "We broke up."

If I go back to the experience of Babaji and the semi-truck, in some ways, part of me did die and we went out of existence. And then we met a space where we're back in existence.

This is truly living a magi experience. When people say, "Aren't you really scared to drive through Mexico?" It's like, no I'm not.

My baby dog, my professor Ollie died this week and I keep getting these calls:

"Oh, are you okay?? How are you doing?"

And it's like there's no part of me that would allow myself— I mean, I'm allowing— to go into a place where I would hit grief and suffering. It's bizarre.

There's a little tiny portion of my humanity that's says, "Oh my god, we need to grieve this really hard in proportion to how much we loved him." And I've shed a few tears.

Ollie immediately, when he left the body, he immediately started showing me what he was doing outside of the body because death is an illusion.

So, it's really hard to explain. It makes me seem like a cold-hearted bitch, but I don't have... the emotional body also impacts this wave function collapse.

If we have really high swinging emotions, right?

My emotional body has integrated. I cried sensual tears when Ollie left physical form, but I don't think people can truly understand that you don't grieve something.

In the last public video I shared, I said the roof could cave in and I would just deal with what's in my immediacy. It wouldn't be like, "The roof caved in! I did something wrong (crying sounds)."

It's like nothing is personal. It's very hard to explain. Everything is yours but nothing is personal. No one *did* something to you.

Ollie left his body in a beautiful way and there's not one piece of me that can go into any kind of despair about that. I've given myself permission to do that (grieve), I waited for it. It's like I have moments where I cry but then it's light, and I'm having a full-on conversion with the professor.

By the way, he's doing the second video here, believe it or not (laughing). It's going to be really, really good.

Right, so the wave function collapse.

None of this is going to apply if you haven't integrated your mental body. I'm not talking about your biological brain, but your mental body that's been dragging you around, and creating emotions and the storylines.

"I can't feel anything! I have no passion."

Yadda yadda yadda.

Until you get past that and until this personality, the designated ascende lifetime, flakes off... none of this is going to happen.

This is not something you come out to meet. It's what slides in the back door, through your personal experience.

So, what pulls the trigger in a wave function collapse?

Where it's like we're going from all the P's to... the function collapse makes the entire ensemble work together to produce a single perceived outcome.

You see the outcome and I see the outcome. But hanging out in the P's there's no single perceived outcome. You're in the AND. So, what exactly pulls the trigger in a wave function?

It's triggered by the perception.

What has Kuthumni been telling us (since October of 2021)?

Back away from the need to perceive. Back away from the need to perceive of one thing or another.

The P's hang in the air until (the) perceptions from a 'me' or 'little-s self' consciousness produce a single outcome.

The collapse into a single experience depends on how the brain processes information.

So, if you think the mind is an Atlantean-designed prison trap, you're going to produce a single perceived outcome.

If you're in your sovereign mind and biological autonomy, you're not reduced down to an *insulting* singular perceived outcome because you have backed away from the need to perceive.

You went so far beyond the mind that is stretched and snapped into its sovereign place.

WAVE- PARTICLE 'DUALITY'

"IT SEEMS AS THOUGH WE MUST USE SOMETIMES THE ONE THEORY AND SOMETIMES THE OTHER, WHILE AT TIMES WE MAY USE EITHER. WE ARE FACED WITH A NEW KIND OF DIFFICULTY. WE HAVE TWO CONTRADICTORY PICTURES OF REALITY; SEPARATELY NEITHER OF THEM FULLY EXPLAINS THE PHENOMENA OF LIGHT, BUT TOGETHER THEY DO." ~
UNCLE ALBERT (EINSTEIN)

WAVE: STUDY OF MOTION (EXAMPLE: GRAVITATIONAL OR ELECTROMAGNETIC)

PARTICLE: MEASURABLE, OBSERVABLE MATTER (EXAMPLE: ELECTRON OR ATOM)

Wave - particle duality. So, things are either, in science, they're either a wave function or a particle. You have two options. This is just to explain the paradox of life through our friend, Uncle Albert.

You don't know who Uncle Albert is?! He's Einstein! Uncle Albert Einstein (1879-1955).

So, our dear Uncle Albert Einstein said, "*It seems as though we must use sometimes one theory...*" The wave function theory. "*... while at times we may use either.*" The particle, the singular outcome.

"We are faced with a new kind of difficulty. We have two contradictory pictures..."

All the possibilities (versus) one.

A scientist would get on here and argue with me and tell me I'm not explaining it right, but I'm explaining it to you in a way that will resonate with your individualized energetic imprint neurons and neural networks.

So, Uncle Albert says, "*We have two contradictory pictures of reality; separately neither of them fully explains the phenomena of light,*" which is how we're perceiving this relativity, how we perceive Earth and nature and other people, "*but together they do.*"

So, we talked about waves, waves are the study of motion.

For example, a gravitational wave (dropping a pen) made that pen drop. Gravity.

Or how neurons communicate is through a chemical or an electric communication from one cell to another cell. They're not just communicating neurons between neurons; they're also communicating out to your muscles. So, if you work out, it's good for your mental health.

Mental health as in not having dementia later in life because it's keeping the brain active in ways that it wouldn't be if you just lived a sedentary life. There (are) all these studies that show dance helps the neuroplasticity, for lack of me not having all the studies printed out right here.

A particle is a measurable, observable matter. Physicality. For example, you look in your microscope and you can see an electron, or a proton, or a neutron— which are subatomic particles that make up an atom. So, there's an atomic particle, there's a subatomic particle. I'm just trying to give you some (easy) examples.

Do you need to get all this?

No, but Einstein is just saying there's a paradox. A seemingly dualistic experience that if you look at one or the other, a singular matter or a wave function... the motion, the possibilities, the probabilities, all of it combined in a very fluid function. A math equation. Then you can begin to make sense of this reality through the paradox.

BIOCENTRISM: LIFE CREATES REALITY & NOT THE OTHER WAY AROUND

- The behavior of subatomic particles are linked to the pretense of an observer.
- Without consciousness, "matter" (externality/ relative reality) hangs in an undetermined state of probability. For example, any Earth before life on it, only existed in a probability state.

Biocentrism is the concept that life creates reality, not the other way around. Let's go to the second bullet point, for those of you who are visual.

So even the people who created the framework of biocentrism know that matter is a real-illusion (or reality relative to the life creating it).

That's why they even put "matter" in quotes because this physical matter wouldn't exist without the observer, without the human being observing it— and actually without animals observing it, and the mineral kingdom observing it.

We'll get into that in the second video.

So, biocentrism is like going from the world is flat to understanding the world is round. All planets revolve around Earth, to all planets revolve around the sun. Heliocentric galaxy.

Okay, so we're going through a revolution here.

Kuthumi and I spend a lot of time in this, it's like another renaissance... and science, and art, and understanding of how energy responds to consciousness.

These people understand that matter is energy. This is why you're here on Earth.

These scientists reincarnated on Earth to come at this beautiful experiential time of science catching up to consciousness. Shaumbra are not the only people radiating their light.

Get out of that closet, like Yogananda said. *“If you are living in this one room all your life, having no contact with what’s beyond the walls, you would say that this is the whole of your world.”*

So, it’s like, time for Shaumbra to step out of the box, or whatever spiritual, whatever (group) you came from.

You start to realize that science is catching up to consciousness. These people incarnated on Earth to add their consciousness to these massive developments.

New books are coming out, this just came out in paperback back in November 2021 (*The Grand Biocentric Design*). The Father of Neuroscience book just came out this month.

Everything is starting to go in that direction. This has huge implications for Artificial Intelligence as well, but I won’t do that on this (video).

So biocentrists, for example, realized Earth, before it had any life on it, only existed in a probability state.

Life creates reality and not the other way around.

(Said another way)

Most people, if you read a textbook, there’s a Universe that was created by a Big Bang. And time and space exist in this Universe already. And then you have one little lifetime for a short while and then you leave, and the Universe exists independent of you. Time and space exist independent of you.

Biocentrists know that time and space don’t exist unless there’s an observer, unless there’s life to observe the passage of time and the physicality of space.

And not only do they know what we know, they have developed experiments to prove it and they’ve made it into mainstream media. This is a popular book.

It’s not metascience.

This guy is NOT going to sell you a crystal or take you on a retreat with those music bowl things; they’re so annoying — it’s like nails on a chalkboard. No, this guy is like in the laboratory. He’s not giving a yoga retreat with metascience.

This is like legitimate stuff. It’s not just like woo-woo whatever and you get a free crystal at the end of the week. No, this actual science catching up and even going forward, I would say.

They're really understanding that this biological form can truly begin to comprehend consciousness. And we don't have to bypass the mind.

The other bullet point here was, the behavior of subatomic particles (is) linked to the presence of an observer. So, energy responds to consciousness.

I'm not talking about... They're talking about the observer likely from, I mean in some ways, from this singular human experience. I think this scientist knows that this is not a singular human experience, but he writes the book that way.

In our case here, for our (intents) and purposes, the observer is consciousness.

You move from energy thinking (it is) in charge of things, human freewill, to the divine will.

And as the observer views energy, matter, particles, all of it... it responds to the consciousness.

Without the consciousness, none of it really exists. Time doesn't exist, space doesn't exist, particles don't exist. "Matter" doesn't exist. This guy knows that and he's not wearing crystals around his neck, I promise you.

So, in all, Professors Sarah and Kuthumi here, we're talking about backing away from the need to perceive is essential for creative neutrality.

WAVE FUNCTION COLLAPSE

- Multiple outcomes (Ps) hang in the air until a wave function collapse makes the entire ensemble work together to produce a single perceived outcome.
- What exactly pulls the trigger in a wave function collapse?
- The common idea that the collapse is triggered by 'my' perception of one thing or another.
- The Ps hang in the air until perceptions from a 'me' consciousness produce a single outcome.
- The collapse into a single experience depends on how the brain processes information...

—THE GRAND BIOCENTRIC DESIGN: HOW LIFE CREATES REALITY
ROBERT LANZA, MD & MATEU PAVSIC WITH BOB BERMAN, 2020

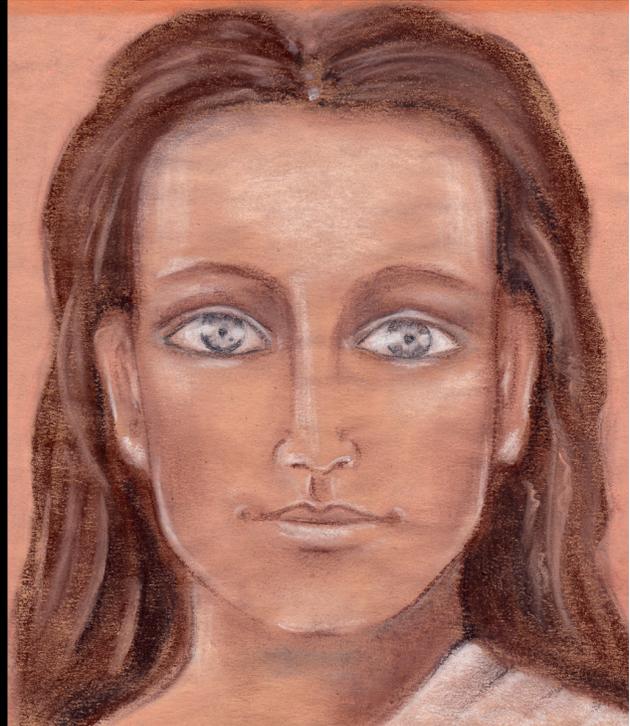

Creativity neutrality is the wave function doesn't collapse. You just exist in the P's without producing a single perceived outcome— *unless* you consciously, through divine will, create the singular perceived outcome.

I think it'd be very rare that you would want to do that. And you'd need someone else to come and perceive your single outcome (laughing). Alright, hanging out in the P's.

A PERSONAL ANECDOTES

BABAJI &
THE SEMI-TRUCK

OLLIE &
THE HOT PAN

Personal anecdotes.

The other moment I had – as this time space continuum/ little shooting star experience (I spoke of before) began to happen is...

I was in the middle of cooking dinner like a mad scientist. I had like six pots going (on the stove top) and I had my dogs laying on the floor, on my feet while I was cooking. And I had a hot top fly off (a cooking pan).

It was flying in the air, and it was similar (to the last anecdote).

It was hanging (in the air). All the P's were hanging (in the air).

And eventually I knew the gravitational wave, the motion of gravity, was going to make the hot pot land (somewhere).

So, I'm literally watching it all. And I'm not thinking, "Oh! I gotta (something)..."

I did have a moment where I was like, "(I) can't get to it in time. It's just going to land."

It's piping hot and the reason I dropped it is because, I do this a lot, I touched it without a potholder.

Because I don't have the program anymore where it's like, "Don't touch that; it's hot."

I need to reprogram that back in. I got rid of so much programming, I don't have the don't touch that, it's hot (program in my brain).

But I could see it all happening and eventually the pan landed on the dog, but not heavy and it didn't burn him even though it was scolding hot. And everything was fine.

Moving through the time space continuum. Fluidity. Can I teach you how to do this? No, I'm just telling you it's happening. It's just possible.

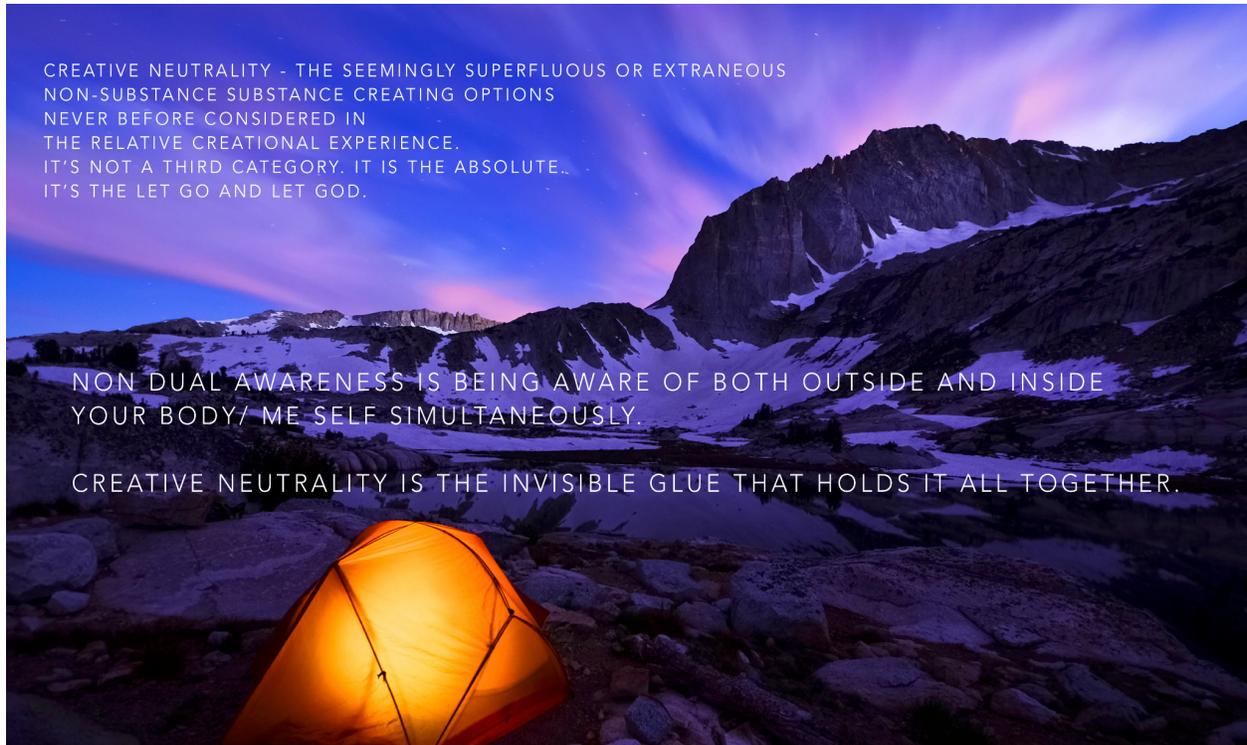

It's possible to live like this all the time. Not just have one little moment that you tell everybody about over and over again, and you use it to hang on to your knowingness.

No, the magi live like this.

Backing away from the need to perceive, which is *Era of the Magus Channel Number 6*, is essential for this creative neutrality.

Now, I had Kuthumi define creative neutrality and it's quite bizarre, but he said this is what it is.

So, I had an English teacher for a mother, so my vocabulary in English is very, very large.

I realize not all of you have English as a first language, nor do you know giant English words. So first of all, I'm going to define these things.

Superfluous is like extra information, too much information almost.

And extraneous is like unrelated information.

You know, when someone starts telling you a story and they have a bunch of extraneous details that are not related to the story, and you're like get to the point, it's not related. It's really interesting that he would add these words.

So Kuthumi says, "*Creative neutrality is the seemingly superfluous or extraneous non-substance substance...*"

...good luck with that...

"creating options never before considered in the relative reality creational experience."

We're going to go back (laughing). We're really in Newton, and Einstein, and all the other beautiful super conscious scientists that have led the way to help light up consciousness on planet Earth.

Where it's like seemingly unrelated information.

Energetic imprints and individualized neuron cells that are seemingly unrelated to an event... (they) light up, creating options never before considered.

This is really like a deeper, fizzy, synapse-firing-inducing experience (from) either/ or (duality), to AND (nonduality).

You know, Adamus saying, "Don't make a decision for six months."

So, you can really see how creational neutrality works.

That doesn't mean there won't be an impetus to act. It's just the action comes in a very neutral way. Without... (and) I can't stress to you enough, without the emotional garbage.

God, if Ollie had died one year into my realization I would have been like, "I can't stay."

It would have been all about me, "I can't stay on Earth. I lost my best friend. Why is this happening to me?"

But without the emotional baggage, you can actually experience grief fully.

You can experience love fully.

Without the emotional garbage created by these closed-loop system thoughts...

(For example) A good dog mom will grieve her dog for exactly one year and feel really shitty about everything.

No. I can experience his death as beautiful, and it be real and I'm not faking it to you guys.

You know, if I had to leave a partner now, I would literally just pack my suitcase and take off. (Clean break).

But after realization my partner and I broke up, I was in that mental and emotional heavy garbage.

You're not in creative neutrality if your identity, mental body, emotional body... The emotional body and mental body are causal bodies. Causal bodies. They're not in the biology but they're like these overlays of the biology.

NOTE: Here we are saying that the mental and emotional bodies belong to a category of causal or non-physical bodies that 'hang' around the physically perceived biological body.

Kuthumi uses the word Causal to describe a specific membrane in the April 2022 Satsang.

So, here causal is a category; and in the future, he uses it to distinguish between the various forms of subtle energy that surround the bio body.

So, when you get really clear and sovereign, and your mind is an open loop system, and the neural networks have redesigned themselves...

You've got your biology that's integrating into the free energy body, creating the New Human Species, which we talk about in depth in the Light Body Sessions.

But these causal bodies (again category) also have to integrate somewhere along the way. And they're just kind of an overlay.

If you talk to people, like my dad is in the near-earth realms, and he's in the astral realms.

It has a different distinct layer of feeling.

You know, they still have food there, but it's not the kind of food we eat here. They still have music. They have things related to Earth but it's happening in a different way. They have a form, but it's not a biological skin flesh form.

NOTE: It's a causal form – in this case astral body.

So, the way I feel into the mental and emotional bodies is they have similar quality.

Or they're kind of in the physical world, but they don't have matter.

But they still affect the matter, right?

Like when I was still grieving my dad's death, I had physical symptoms.

My liver started to shut down.

So, all of these things are impacted.

So, this only happens when you get clear, through allowing, AND.

Allowing AND. And mental body, emotional body.... causal bodies integrate, and (as a result) your identity has been chipped to bits.

You crossed the valley of alone and swam through the river of sadness. And now you're here.

I used to say, after I swam through the river of sadness, I'd find myself back on the shores of sadness. And then I'd be back in the river of sadness. And then I'd be back on the shore.

And even with the most traumatic thing that could possibly happen, not being a trauma— the loss of my beautiful dog who is so sweet and also will be helping me write the second video here...

It's no longer a temptation to jump in the river of sadness or back into the valley of alone.

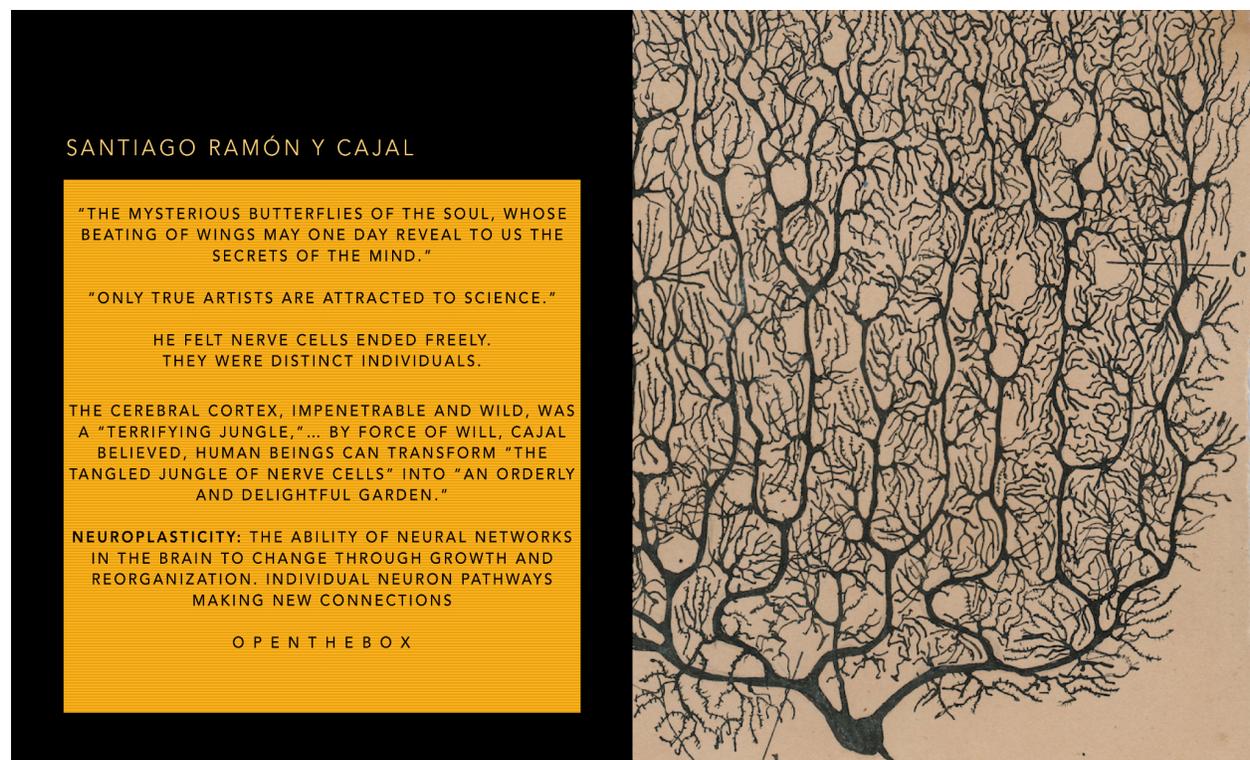

You realize you're not entitled to anything and that you're not in charge of anything. And instead of that being like, "Eh..." (instead) it's "Ahhhhhh!"

Right? It's like... whatever will be, will be. *Que Sera Sera, whatever will be, will be* (singing).

But there's this imminent intelligence, divinity. Exuding divinity. There's an imminent intelligence that has a passion for I Am that I Am and expressing that.

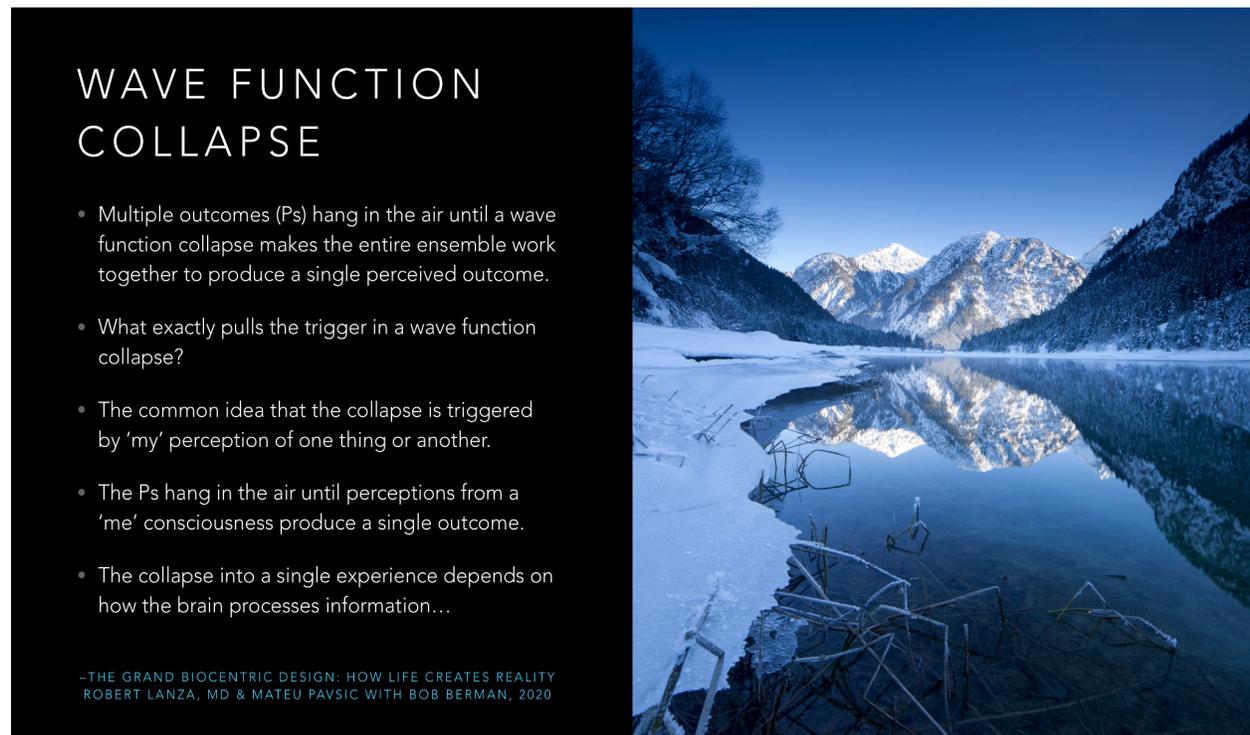

Experience and expression (combined). The Undefined YOU in an Undefined Reality. But the reality is you.

I mean, each of these...

Each of these individualized cells, these neurons, these energetic imprints— it's the whole wall of fire is in your brain. And instead of that being chaos and torture, it's creational and free.

We don't have to put it in a category. We don't have to reinforce an identity. Reinforcing an identity...

WAVE FUNCTION COLLAPSE

- Multiple outcomes (Ps) hang in the air until a wave function collapse makes the entire ensemble work together to produce a single perceived outcome.
- What exactly pulls the trigger in a wave function collapse?
- The common idea that the collapse is triggered by 'my' perception of one thing or another.
- The Ps hang in the air until perceptions from a 'me' consciousness produce a single outcome.
- The collapse into a single experience depends on how the brain processes information...

-THE GRAND BIOCENTRIC DESIGN: HOW LIFE CREATES REALITY
ROBERT LANZA, MD & MATEU PAVSIC WITH BOB BERMAN, 2020

Reinforcing an identity is the wave function collapse into a single perceived outcome.

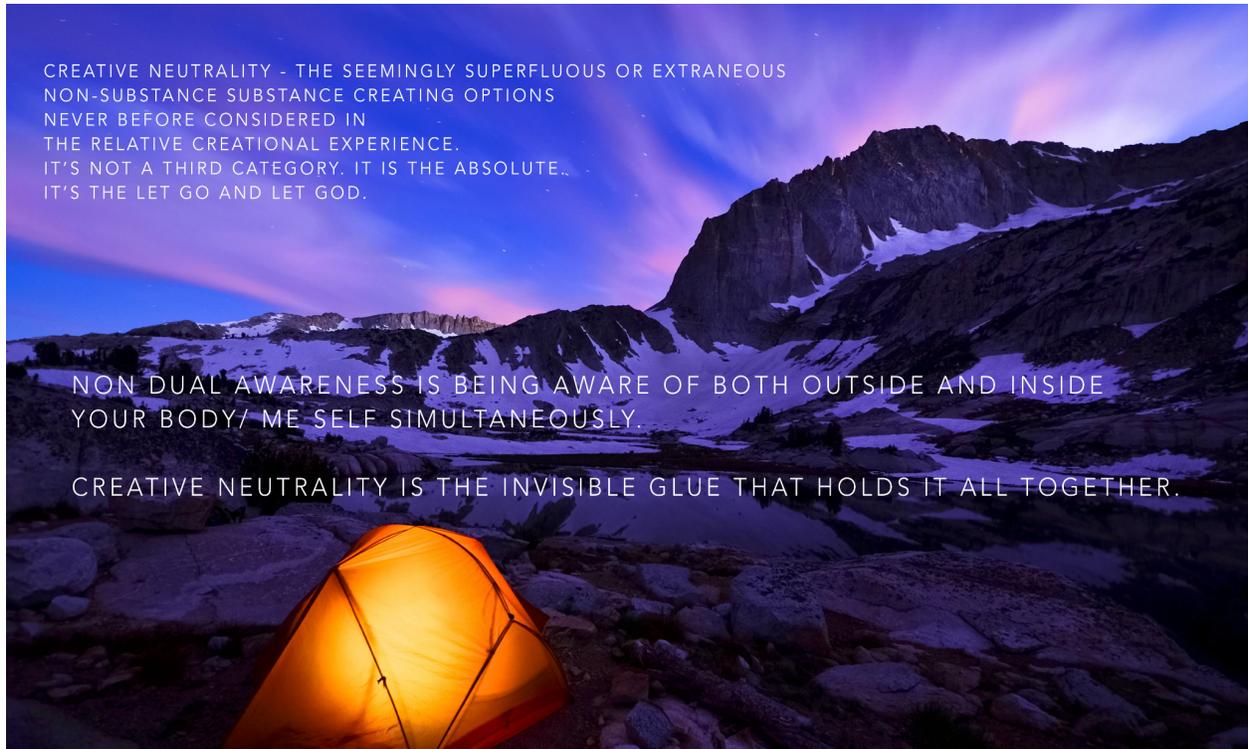

Wisdomize the single perceived outcome.

Experience a single outcome, wisdomize it.

Experience a single outcome, wisdomize it.

Use it to reinforce your identity. I was an idiot and now I'm wise.

This is why you're here, to bring magic back to the world.

So non-duality, I know most of you aren't into that.

Nondual awareness is being aware of both outside and inside your body/ me self, simultaneously.

What Kuthumi and I want to do is talk about (how) creative neutrality is the invisible glue that holds it all together.

When you realize you're driving a car that's not really made of "matter," right?

Real-illusion.

Everything is so loosely held together by this invisible glue.

It's held together by the neurons that are perceiving it, both through thought— because thought ends up being a very useful tool here, and sensuality.

It's all made up in the kaleidoscopic experience.

It's not like, "Thought - Bad! Sensuality - Good!"

I am caveman Shaumbra: thought bad, sensuality good.

You know?

“Car wreck, bad. Avoiding car wreck, I’m a Master.”

You know, we really go beyond— those things are all lovely. We need to do those things; we need to have those steps. The magi experience is really beginning to find the flow and the freedom of being the Undefined YOU in the Undefined Reality.

This has major implications for the environment. You guys want to sit on a bench and radiate your light into a vortex of power, right?

But you’ll do more good looking into your inner Putin, the places where there’s still violence or aggression in the corners of your consciousness. So that rewrites the world.

The way animals view the world through their biological body creates life. It creates potentials, possibilities, probabilities, and passageways for the Earth, for the environment to heal itself.

The ocean takes in twenty-five percent of carbon dioxide on this planet, it’s not just trees who take the carbon dioxide and turn it into oxygen. The ocean does as well.

The ocean’s feeling into itself through the eyes of its marine life. Turtles, dolphins, whatever else to see— can it take in more of these greenhouse gasses and produce more oxygen?

Life begets life.

So, it’s not just about you anymore.

You really have gone beyond the me pattern and to have this experience.

It’s essential.

How do you do all that? You allow. You stop with the distractions. You stop with the selfies. You stop watching so much fucking TV, right?

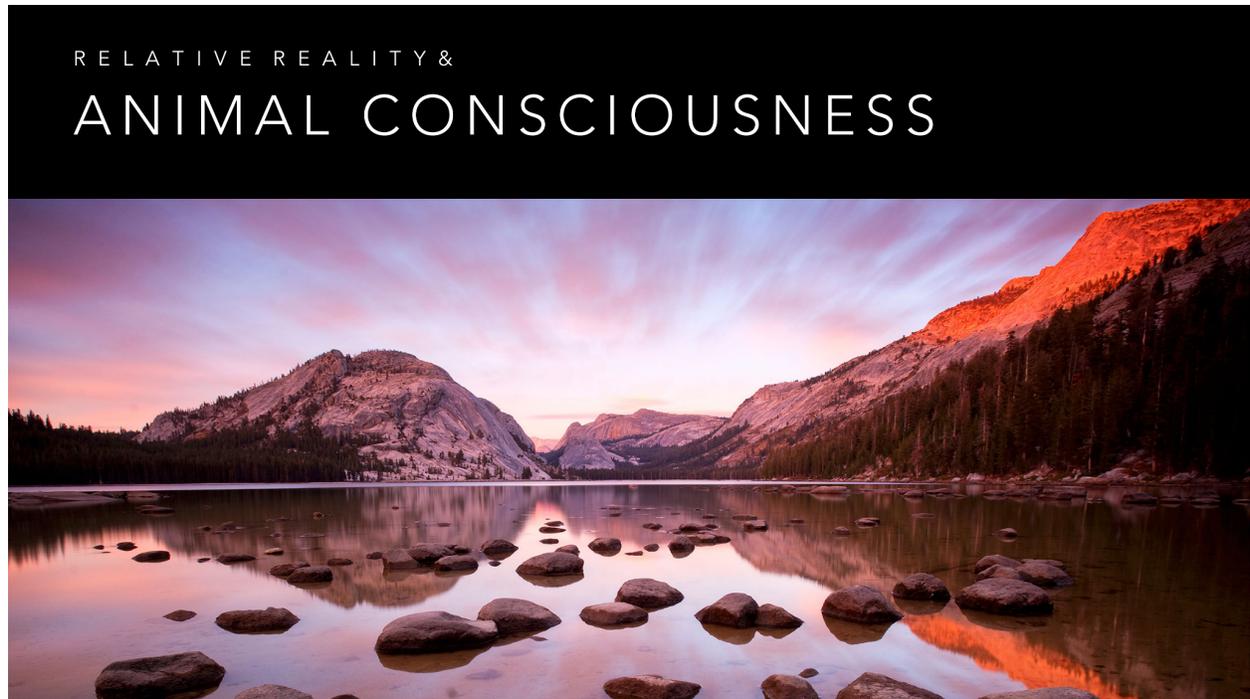

It’s just... you sit with yourself.

You do the self-inquiry. You tap into the future now Self.

You put yourself *in life* to experience it flowing through you, unfiltered.

Alright, so that concludes our presentation today. This is my second run-through, the first one was a little rough (laughing). Thank you for the four beings on the call today for sitting through it.

Just to give you kind of an idea of some of the stuff we're going to be doing is:

RELATIVE REALITY &
ANIMAL CONSCIOUSNESS

We're going to talk about relative reality and animal consciousness. I'm not saying animals are souled beings, let's not get into that debate. But I'm saying, how animals perceive their surroundings has an impact on the biodiversity and health of the planet— it's fascinating science.

Ollie was always observing everything, all the time.

He would just sit in a meditative state.

I mean, he would lay at a river like this for hours. Always just observing. And I wondered what he was doing.

There are all these scientific things that show this. *The Grand Biocentric Design* is not just for human biology.

And beyond all of this— I'll tell you, having a sovereign mind... and it works... and experiencing each energetic imprint and lifetime in the neurons.... is all in there...and to have this biology work so beyond Atlantean Dream and beyond....

I cannot stress it enough.

“Once we begin to take a look at animal consciousness, we find ourselves in an almost endless exploration of strange new worlds.

Remember, reality exists relative to a particular observer - animal consciousness, like human consciousness, involves the collapse of the wave function.

And the unique physiological setups of other animals allow their choices and wave function collapses to unfold along pathways that diverge from ours in wonderfully creative and useful ways.”

—THE GRAND BIOCENTRIC DESIGN: HOW LIFE CREATES REALITY
ROBERT LANZA, MD & MATEU PAVSIC WITH BOB BERMAN, 2020

So, just to give you a teaser for some of the stuff we’re doing next.

This is from this book (*The Grand Biocentric Design*), it says, “Once we begin to take a look at animal consciousness, we find ourselves in an almost endless exploration of strange new worlds.”

“Remember, reality exists relative...” that’s how we get the term relative reality.

“Remember, reality exists relative to a particular observer - animal consciousness, like human consciousness, involves the collapse of the wave function.”

“And the unique physiological setups of other animals allow their choices...”

The choice is what collapses the wave function. Sometimes we use it, other times something else happens. The life of the magi.

“And the unique physiological setups of other animals allow their choices and wave function collapses to unfold along pathways that diverge from ours in wonderfully creative and useful ways.”

For example, a dog experiences most of its sensuality through its sense of smell.

Alright.

BACKING AWAY FROM THE NEED TO PERCEIVE IS ESSENTIAL FOR
CREATIVE NEUTRALITY

I want to go over it like ten more times, but I'm not going to do that.

Feel into creative neutrality.

Backing away from the need to perceive is essential for creative neutrality.

Neutral is not boring. Neutral is where the passion comes in.

Neutral is not a third category: positive, negative, neutral. Good, bad, I don't care. No, neutrality encompasses ALL. All P's.

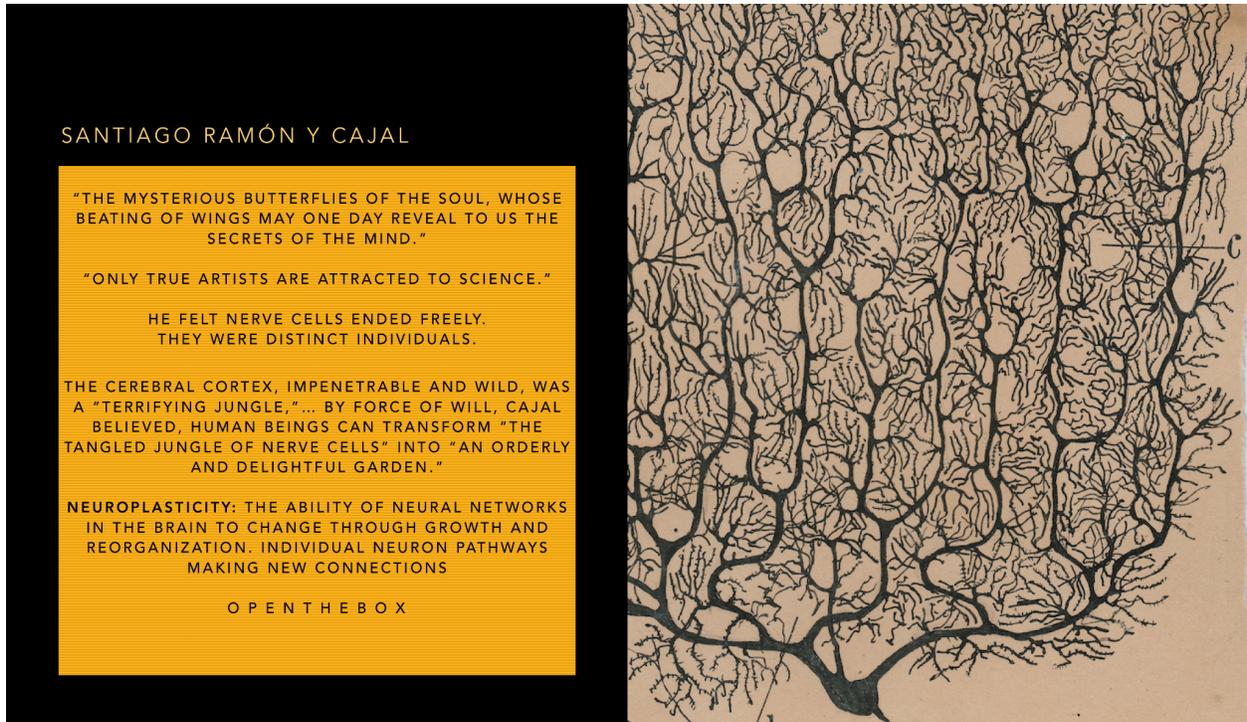

NOTE: Covered in the Living in the Garden of New Life Series.

And it's really... Creative neutrality is the permeable membrane through which your Christ Consciousness can shine through. Your divine intelligence, your imminent intelligence.

And clearing all this stuff up (in the brain)... By going beyond it, allowing, allowing, allowing—stretch and snap back into place.

Some people get there through meditation, (but) I doubt that's how you got there.

Clearing all this up we can really be the creators in our creation.

We go from the terrifying jungle to an orderly and— and I'm talking about new energy, orderly and delightful garden.

And for those of you who really feel into that third to last Atlantean lifetime, or feel into that you participated in the headbands and put them on...

Those of us who were in the back end of developments, I've talked to a lot of people, this is happening simultaneously.

There's an energetic imprint in your mind of that lifetime.

In this design, they left potentials, possibilities, probabilities, and passageways for the sovereign mind. So, you didn't do so bad, Afterall (laughing).

Alright, I am love with you. Na-Ma-STAY on Earth.

We are Sarah and Kuthumi and this is our Magi(c) Event:

An Undefined YOU in an Undefined Reality.
